Loved the game. Couple times through now with friends and family and sometimes the keys get stuck outside the window before it's unlocked. Hopefully there's a fix for this glitch. Super fun though. Ready for the next update.. There's no images or cinematics.. Of all the VR games I have played so far, this was the most immersive, as I even forgot for a moment that there was no table and "dropped" my controller on the floor as I needed to do something outside the game. Then for several minutes, I felt very strange holding on objects. I am very surprised since I have played quite a few VR games and experiences and have not "lost" my sense of the real world. I don't know if I should be happy or concerned :)

The puzzles were just right, not too hard and quite logical, so hopefully the game designers will not decide that they need to make puzzles so hard that only through collaborative cheating one can solve them (as most games with puzzles seem to do - I am getting way too old for those games).

Certainly looking forward to the release of this game.

VERDICT: 8/10, lacks replayability (yes I nearly 100%ed the game already) and co op multiplayer to make it 10/10. Offers some unique puzzle mechanics, namely a combination of pinball and pattern recognition. Levels are designed to be short and contained in small areas. Puzzles are mostly pretty easy to figure out and the game is very forgiving with mistakes. There is a moderate amount of trial and error necessary to solve some puzzles.

I experienced no performance issues of any kind while playing this game.. this is horrible i want my money back. Frog Climbers is not a game which you can play like 10 hours a day.

But if you want to kill Time it's a perfect pastime game.

I could play the multiplayer mode on the gamescom and I can say that it makes the most fun when you play it with your Friends!

Really fun party game!. Its a really good game to chill and make some puzzles

Great game, just wish it had multiplayer.. Stupid game ever without any logics in some situations. This game is pretty much worth the \$5 I payed for it. Despite the fact that the online has no players and you can complete the story in a 4 hour sitting, this game is a fun dungeon crawler that runs well and plays well. This game is also pretty great for people who love games that are splitscreen co-op, like me.

Honestly, I'd like to see more players online on this game. I could not find a single server, and if you're looking to sell/collect trading cards, it looks like only 4 or so people have them up for sale. This makes some cards 35 cents and nobody's gonna buy it. I'm hoping that this game gets more attention and sales so the playerbase isn't looking like a few hundred people who only beat the story and that's it.. I wish there were more interactable objects to pick up but apart from that this was a fun little experience! . I got almost 3 hours out of this for 62 cents. Not much of a story but very large enviroments. If you like indie First Person games you will get your moneys worth here.. Timeless and genre defining
